

## ACKNOWLEDGEMENTS

It has been said that success occurs when hard work, intelligence, and opportunity converge. I have many people to thank for making such a convergence possible in my life. First, to my advisor Lynn Fuchs, you showed me that with intellect, dedication, and hard work, excellence is achievable. Thank you for your guidance, encouragement, patience, ever quick responses to questions, and for making this invaluable experience possible. To Joe Jenkins, you have a gift for seeing and encouraging the potential unique to each of your students. I am so grateful to benefit from that gift, and doubt I would be here without it. To Don Compton and Doug Fuchs, thank you for taking the time to serve on my committee, share thoughtful feedback, and mentor my development as a teacher and researcher throughout the program. I always appreciate your perspective, wit, and innovative ideas.

I would also like to thank my family and friends. To my office mate and friend, Pamela Seethaler and her research staff, thank you for your careful work with data collection. You made this dissertation possible and I so appreciate your help. To the wonderful women of my book club and the members of the Fabulous Fourteen, thank you for pushing me to work hard, but keep smiling these last four years. Your friendship has meant more to me than I can put into words. Also, thank you to my family for modeling curiosity, love of knowledge, and social conscience. To my parents, Bill and Terrea Zumeta, for as long as I can remember, you encouraged me to extend my educational ladder. Your unconditional love, support, and pride in my accomplishments have meant the world to me. Finally, to my grandparents, Ruth and Bert Zumeta and Marie O’Rand, thank you for making my education possible. Although you are no longer here, I know you are watching, and are proud.

## TABLE OF CONTENTS
