Tuesday, February 15th from 12-1 at the Law School

Kilowatt Ours follows Jeff Barrie's 18-month journey across the Southeastern U.S. examining the environmental and human health consequences of energy production in America today. From mountain top removal coal mining in West Virginia, to air pollution and childhood asthma across the southeast, to global climate change, Kilowatt Ours sheds light on the connections between individual choices and the greater good in a thought-provoking fashion.

The film takes viewers on a light-hearted, step-by-step exploration of solutions. The goal of this project is to increase public awareness of problems and solutions, motivating individuals to strive to make a difference.
