FACULTY:

WILLIAM K. BOWLING, M. D.,
Professor of Malarial Diseases and Ethical Medicine.

WILLIAM T. BRIGGS, M. D.,
Professor of Surgery.

THOMAS L. MADDIN, M. D.,
Professor of the Institutes and Practice of Medicine.

WILLIAM L. NICHOL, M. D.,
Professor of the Diseases of Women and Children, and of Clinical Medicine.

JOHN H. CALLENDER, M. D.,
Professor of Diseases of the Brain and Nervous System.

VAN S. LINDSLEY, M. D.,
Professor of Physiology, and Lecturer on the Diseases of the Eye and Ear.

THOMAS MENEES, M. D.,
Professor of Obstetrics.

JAMES M. SAFFORD, M. D.,
Professor of Chemistry.

THOMAS A. ATCHISON, M. D.,
Professor of Materia Medica, Therapeutics, and State Medicine.

THOMAS O. SUMMERS, Jr., M. D.,
Professor of Anatomy and Histology.

CHARLES S. BRIGGS, M. D.,
Demonstrator of Anatomy.

THOMAS W. MENEES, M. D.,
Associate Demonstrator of Anatomy.

WILLIAM J. SNEED, M. D.,
Assistant to Chair of Surgery.

W. A. ATCHISON, M. D.,
Assistant to Chair of Diseases of Woman and Children, etc.

ADDISON A. EAST, M. D.,
Assistant to Chair of Diseases of the Brain, etc.

AMBROSE MORRISON, M. D.,
Assistant to Chair of Physiology.

W. D. HAGGARD, M. D.,
Assistant to Chair of Obstetrics.

JOHN H. SNIVELY, Phar. D.,
Assistant to Chair of Chemistry.

W. J. McMURRAY, M. D.,
Assistant to Chair of Materia Medica, etc.

M. BAXTER, M. D.,
Assistant to Chair of Anatomy, etc.

THOMAS L. MADDIN, M. D., President of the Faculty.

NASHVILLE,
TENNESSEE.
ANNOUNCEMENT.

SPRING AND SUMMER SESSION, 1877.

The Faculty of the Medical Department of the University of Nashville, and of Vanderbilt University, will have a Spring and Summer Course of Lectures, commencing on the 5th of March, 1877, and terminating on the 5th of July, 1877. This Course will be conducted, in all respects, as the Winter Courses of the school have been, the regular Professors filling their stated hours, and the lectures and demonstrations being quite as full and thorough, while the clinics will be more abundant. Degrees will also be conferred at the close of the session in July.

The Chair of Malarial Diseases and Ethical Medicine has been created to meet the wants of the practitioner in the treatment of malarial diseases in all their protean forms, and of the profession everywhere, in the promotion of a higher esthetic culture. It is with pleasure that the Faculty announce the return of Dr. W. K. Bowling to his old field of labor and of love. In the department assigned him he has long held advanced views of the highest interest to the profession.

LOCATION.

It would be difficult to find a city combining more advantages, as a location for a Medical School, than Nashville. Highly favored in climate, midway between the cold of more Northern cities and the debilitating temperature of the extreme South; a great railroad center, to which lines converge from all directions, having an active population of nearly fifty thousand; surrounded by an exceedingly fertile and beautiful country, thickly peopled; the capital of the State; the location of the Blind and Lunatic Asylums; the seat of great Universities—all make it a place for a School of Medicine.

COLLEGE BUILDING AND MUSEUM.

The building occupied by the Medical School is a large and commodious edifice. This, in connection with the hospital, forms a handsome block of buildings, presenting two fronts, and of imposing appearance. The ample grounds around the block extend across from College to Market streets, and include an entire square. The College building has a large Hall for lecturing and general purposes, a spacious Chemical Laboratory and Lecture-Room, a well-arranged Amphitheatre, a very large and inviting Museum Room, together with two large and well ventilated Dissecting Rooms, Special Labora-
tories, Professors' and Apparatus Rooms, Janitor's Rooms, etc. The entire building is supplied with water and gas, and is heated with furnaces, and made comfortable during the limited cold weather we have in this climate.

The Museum is noted for its extent, and the value and variety of its Anatomical, Physiological, Pathological, Surgical, and Obstetrical specimens, and for its Cabinet of Materia Medica. It has been recently re-arranged, and rendered more complete by new additions. The Chemical portion is well supplied with medicinal substances and preparations, and such other articles as may be required in the elucidation of the theory and practice of Chemistry and Pharmacy.

**METHOD OF TEACHING.**

It is the purpose of the Faculty to make the teaching thorough and practical. Five Lectures will be delivered daily, in the College Halls, upon the different subjects of the course. During the week, the student will hear four Lectures upon each branch of Medicine. Daily examinations or reviews will be held by each Professor at the beginning of his hour, in order that the facts of the previous Lecture may be impressed upon the minds of the students. The various Courses will be illustrated by experiments, dissections, surgical operations, clinics, models, anatomical, botanical, and chemical specimens, and by such other means as may make the instruction imparted practical and pointed. The Cabinets of Anatomy, Physiology, Pathology, Obstetrics, Surgery, Materia Medica, and Chemistry, are richly supplied with preparations and specimens, which will be used as occasion demands.

The Chair of Obstetrics, in addition to its full supply of models in wax, apparatus, instruments, etc., has recently had added to it modern plates and diagrams, making complete its equipage for the elucidation of the entire Course.

The Cabinet of Materia Medica has also been liberally supplied with plates, representations of Medicinal plants, specimens of drugs and chemicals, and all the appliances for the illustration of the branch. The members of the Class will be invited during the Course, to inspect for study this well supplied Cabinet, with which the Museum is furnished.

**HOSPITAL AND CLINICAL INSTRUCTION.**

The Hospital building, erected last year by the Faculty, and entirely under their control, has a frontage of one hundred and fifty-four feet, with other dimensions in proportion, and adjoins the College edifice. Its wards, well filled at all times with ample material for Surgical and Medical teaching, are immediately accessible from the Lecture Halls. This is a peculiar feature, enjoyed by very few Medical Institutions, and one that, with us, has been pronounced by visitors of large experience as teachers, very superior and excellent in arrangement.

In addition to the College Hospital, the hospital wards of the State Prison, numbering eleven hundred inmates, will supply numerous clinical patients.*

In the two hospitals the facilities for witnessing Operative Surgery are un-

* All charity patients will be treated for disease, or be made the subjects of necessary operations, before the Class.
surpassed. Twice a week operations are performed in the presence of the Class. The number of these operations is very large, and the variety great, embracing every Surgical disease and injury, including the Surgical operations of the eye and ear.

The Obstetrical Ward of the Hospital will be under the Clinical control of the Professor of Obstetrics and his Assistant. It is designed to render students familiar with the practical details of Parturition, by assigning to their care, under the supervision of the Professor or Assistant, such cases as may be available, not only in the Hospital, but in private practice also. In this way it is proposed to teach them to diagnose the various presentations and positions, more fully to comprehend the mechanism of labor, and give them facility in manual manipulation and instrumental delivery.

The facilities enumerated afford the Professors of Surgery, Obstetrics, Practice, Clinical Medicine, etc., with a field for the thorough teaching of disease, as seen at the bed-side, unsurpassed by any institution in the country.

DISEASES OF THE EYE AND EAR.

Professor Lindsley, in addition to his Lectures on Physiology, will deliver a Course of Lectures on the diseases of the Eye and Ear, which will be fully illustrated by Clinical material supplied from the Hospitals, and from private practice. The Normal and Pathological conditions of the Eye and Ear will be made especially interesting by the use of the magic lantern, which renders drawings of these conditions life-like and satisfactorily visible to an entire Class.

PRACTICAL ANATOMY.

The Anatomical Rooms, which are under the general direction of the Professor and Demonstrators of Anatomy, are abundantly supplied with fresh and wholesome material. The Demonstrator and his Associate will be present every evening to direct and assist in dissections. Students will be taught the art of injecting, preparing, and preserving specimens, both wet and dry; also the manner of making corroded specimens of the vessels, tubes, and ducts of the various organs. At the proper time, Classes in Operative Surgery will be formed, and each student will receive practical instruction upon the cadaver, in the application of the bandage, in the ligation of arteries, and in the performance of amputations, resections, etc. This Department will be opened on the 26th of February.

GRADUATION.

I. To graduate, the candidate must have attained the age of twenty-one years, and be of good moral character.

II. He must have attended two full Courses of Lectures, the last of which must have been in this Institution. If the candidate has attended a full Course of Lectures in a regular Medical School, or can show that he has been in reputable practice for four years, he may, by attendance upon a full Course of Lectures in this Institution, present himself for graduation. It is required also that the Dissecting Ticket be taken for at least one session.

III. The candidate is elected by ballot, and upon receiving three negative votes will be rejected, but will be entitled to another examination by appear-
ing before a full Faculty, after all other applicants have been examined. No premature examination will be granted except by consent of the entire faculty.

IV. Candidates will not be registered for examination until all fees are paid.

FEES,

Matriculation (paid but once).............................................. $5.00
Professors' Ticket....................................................... 50.00
Dissecting Ticket...................................................... 10.00
Graduating Fee......................................................... 30.00

No charge is made for the privileges of the hospital. Students, upon their arrival, must call at the Secretary’s office, and, after registering their names, pay for their tickets.

Graduates of Regular Schools will be admitted to the Lectures upon the payment of Matriculation Fee.

TEXT BOOKS.

Anatomy: Gray.
Surgery: Billroth, Paget, Erichsen, Gross.
Obstetrics: Leishman, Playfair.
Diseases of Women: Thomas or Barnes.
Diseases of Children: Meigs and Pepper.
Physiology: Kirke, Dalton.
Materia Medica: Still, Waring.
Chemistry: Attfield, Fownes.
Theory and Practice: Watson, Aitken.
Dictionary: Dunglison.

PRIZES.

Prizes for the Spring and Summer session will be announced at the opening of the school in March.

DIRECTIONS TO STUDENTS.

It will be best for students, upon arriving in the city, to take a hack, and, with their baggage, go immediately to the Medical College and Hospital, on South College street (between Franklin and Priestley streets), where they can obtain assistance in securing such boarding-houses as they may desire. Boarding can be obtained at from three to five dollars per week.

All Communications and Letters asking information should be addressed to

Dr. J. M. SAFFORD, Sec.,
Nashville,
Tennessee.
PRIVATE INFIRMARY

FOR THE TREATMENT OF

MEDICAL AND SURGICAL DISEASES.

This Institution is situated on the corner of South College and Priestley Streets, an eligible situation, unobstructed by the proximity of surrounding buildings. The Institution contains twenty private rooms, completely and well furnished, each room having a grate or grate-stove. Persons desiring Medical or Surgical aid can be accommodated here. Every comfort and attention will be given by the Physicians in charge, Drs. East and Baxter. The Medical Faculty of the University of Nashville and of Vanderbilt University constitute the Consulting Board to the Infirmary. Patients may procure their own Physicians. For further information address

DRS. EAST & BAXTER,

Nashville, Tennessee.
