*This was the faculty when I attended
my first course of lectures in this school in the winter
of 1881 & 1882, W. B. H. H.*

ANNOUNCEMENT.

→SESSION OF 1881-82.←

The Regular Course of Instruction in the Medical Departments of the University of Nashville and of Vanderbilt University will commence on Monday, the 3d day of October next, and end on the last Thursday in February, 1882, which is Commencement Day.

The Preliminary Course of Instruction will begin on Monday, the 5th day of September, and will be free to all who enter for the Regular Course. The Anatomical rooms will be opened at the same time. Material for dissection will be promptly supplied.

In again issuing the Annual Announcement, the attention of the medical profession and that of the public is called to the UNEXAMPLED PROSPERITY which has attended this school. During the session just concluded, this prosperity reached its highest point since the war. The number of students matriculating was nearly FOUR HUNDRED, and for the next winter, the attendance promises to be even greater.

The munificent

ENDOWMENT

of buildings on which the school was founded, has been from time to time greatly increased and extended. Its splendid equipment of Hospital facilities, Museum, Cabinets, Apparatus, etc., enables its corps of teachers to maintain the distinction it has so long held among American schools of medicine. As an Alma Mater of Physicians, it now numbers MORE THAN TWO THOUSAND in its Catalogue of Graduates.

LOCATION.

It would be difficult to find a city combining more advantages as a location for a medical school than Nashville. Highly favored in climate, midway between the cold of more northern cities and the debilitating temperature of the extreme South; a great railroad centre, to which lines converge from all directions; having an active population of fifty thousand; surrounded by an exceedingly fertile and beautiful country, thickly peopled; the capital of the State; the location of the Blind and Lunatic Asylums; the seat of great Universities—all make it a place for a School of Medicine.

COLLEGE BUILDINGS AND MUSEUM.

The buildings occupied by the Medical School and the Hospital form a large and commodious edifice of imposing appearance, fronting both on College and Market streets. The College building has been completely remodeled. A large and commodious Lecture Hall, capable of seating five hundred students, and provided with comfortable opera seats, has been erected. The seats are numbered, and will be assigned to students in the order in which they matriculate. The building is heated by hot air furnaces, which insure perfect comfort during the coldest weather, and is ventilated by flues communicating with the furnace stack.

The Hospital has been enlarged by the addition of three wards and an Amphitheatre for Clinical and Operating purposes.

Besides, there is a large and inviting Museum Room, together with two large and well ventilated Dissecting Rooms, Special Laboratories, Professors' and Apparatus Rooms, Janitors' Rooms, etc. The entire building is supplied with water and gas.

The Museum is noted for its extent, and the value and variety of its Anatomical, Physiological, Pathological, Surgical and Obstetrical Specimens, and for its Cabinet of *Materia Medica*. It has been recently rearranged, and rendered more complete by new additions. The Chemical portion is well supplied with medicinal substances and preparations, and such other articles as may be required in the elucidation of the theory and practice of Chemistry and Pharmacy.

METHOD OF TEACHING.

It is the purpose of the Faculty to make the teaching thorough and practical. *Five* Lectures will be delivered daily, in the College Halls, upon the different subjects of the course.

Daily examinations or reviews will be held by each Professor at the beginning of his hour, in order that the facts of the previous lecture may be impressed upon the minds of students. The various courses will be illustrated by Models, Anatomical, Botanical and Chemical Specimens, Experiments, Dissections, Clinics and Surgical Operations, and by such other means as may make the instruction imparted practical and pointed. The Cabinets of Anatomy, Physiology, Pathology, Obstetrics, Surgery, *Materia Medica* and Chemistry are richly supplied with Preparations and Specimens, which will be used as occasion demands.

The Chair of Obstetrics, in addition to its full supply of Models in Wax, Apparatus and Instruments, has recently had added to it Modern

Plates and Diagrams, making complete its equipage for the elucidation of the entire Course. The Cabinet of *Materia Medica* has also been liberally supplied with Plates, representations of Medicinal Plants, specimens of Drugs and Chemicals, and all the appliances for the illustration of this branch.

HOSPITAL AND CLINICAL INSTRUCTION.

The Hospital building, erected by the Faculty and under their exclusive control, has been enlarged by the addition of three large wards to its already commodious accommodations. It has a frontage of one hundred and fifty-four feet, with other dimensions in proportion, and adjoins the College edifice. Its wards, well filled at all times with material for Surgical and Medical teaching, are immediately accessible from the Lecture Halls. This is a peculiar feature, enjoyed by few medical institutions, and one which has been pronounced by visitors, of large experience as teachers, very superior and excellent in arrangement.

Twice a week Surgical Clinics are held and Operations performed, when necessary, in the presence of the class. The number of these operations is large, and the variety great, embracing every Surgical disease and injury, with the Surgical operations of the Eye and Ear.*

The Obstetrical Ward of the Hospital will be under the Clinical control of the Professor of Obstetrics and his Assistant. It is designed to render Students familiar with the practical details of Parturition, by assigning to their care, under the supervision of the Professor or Assistant, such cases as may be available, not only in the Hospital, but in private practice also. In this way it is proposed to teach them to diagnose the various presentations and positions, more fully to comprehend the mechanism of labor, and give them facility in manual manipulation and instrumental delivery.

The facilities enumerated supply the Professors of Surgery, Obstetrics, Practice, Clinical Medicine, etc., with a field for the thorough teaching of disease, as seen at the bed-side, unsurpassed by any institution in the country.

PRACTICAL ANATOMY.

The Anatomical Rooms are abundantly supplied with fresh and well preserved material. The Demonstrator will be present every evening to direct and assist in dissections. Students will be taught

* All *charity patients* will be treated for disease or be made the subject of necessary operations before the Class *free of charge*.

the art of injecting, preparing and preserving specimens, both wet and dry; also, the manner of making specimens of the vessels, tubes and ducts of the various organs. At the proper time, Classes in Operative Surgery will be formed, and each Student will receive practical instruction upon the Cadaver, in the application of the bandage, in the ligation of arteries, and in the performance of amputations, resections, etc.

This Department will be opened on the 5th of September.

GRADUATION.

I. To graduate, the candidate must have attained the age of twenty-one years, and be of good moral character.

II. He must have attended *two* full courses of Lectures, the last of which must have been in this Institution. The first may have been in any other recognized Medical School.* It is required, also, that the Dissecting Ticket be taken for at least one session.

III. He must have studied medicine for three years under a regular practitioner, the three years to include the time of attendance upon two courses of lectures.

IV. The candidate is elected by ballot, and upon receiving THREE NEGATIVE votes, will be rejected; but will be entitled to another examination by appearing before a full Faculty, after all other applicants have been examined. NO PREMATURE EXAMINATION WILL BE GRANTED EXCEPT BY CONSENT OF THE ENTIRE FACULTY.

Candidates will not be registered for examination until all fees are paid.

* A graduated scheme of study, extending through three years, has been arranged for the accommodation of such Students as wish to pursue a more prolonged course. This, though strongly recommended, is entirely optional with the Student. The scheme is as follows:

(1) The Student may confine his attention for two full courses to Anatomy, Chemistry, Materia Medica and Physiology, and after the end of the second course be examined upon these subjects.

(2) Such Student, during the third course, to devote himself chiefly to lectures upon the Theory and Practice of Medicine, Surgery, Obstetrics and Diseases of Women and Children, upon which subjects only, he shall be examined at the final examination for the degree of M. D., his standing, however, to be determined by the result of both examinations.

FEES.

Matriculation (paid but once).....	\$ 5 00
Professors' Ticket.....	75 00
Dissecting Ticket.....	10 00
Graduating Fee.....	10 00

NO CHARGE IS MADE FOR THE PRIVILEGE OF THE HOSPITAL.

Students, upon their arrival, will call at the Secretary's office, and, after registering their names, pay for their tickets.

TEXT-BOOKS.

Anatomy: <i>Gray.</i>	Physiology: <i>Flint, Kirke, Dalton.</i>
Surgery: <i>Billroth, Paget, Gross,</i> <i>Erichsen, Bryant.</i>	Materia Medica: <i>Stille, Waring.</i>
Obstetrics: <i>Leishman, Playfair.</i>	Chemistry: <i>Attfeld, Fownes, Roscoe.</i>
Diseases of Women: <i>Thomas or</i> <i>Barnes.</i>	Theory and Practice: <i>Roberts, Bris-</i> <i>towe, and Reynolds' System of</i> <i>Medicine.</i>
Diseases of Children: <i>Smith.</i>	Ear: <i>St. John Roosa.</i>
Dictionary: <i>Dunglison.</i>	Eye: <i>Carter, Welis.</i>

DIRECTIONS TO STUDENTS.

It will be best for Students, upon arriving in the city, to take a hack, and, with their baggage, go immediately to the *Hospital and College Buildings, on South College Street two squares south of Broad Street*, where they can obtain assistance in securing such boarding-houses as they may desire.

Boarding can be obtained at from \$3.00 to \$4.50 per week.

N. B.—We shall be pleased to receive the address of any physician who may desire a copy of the Catalogue.

Alumni of the School are respectfully requested to notify the Secretary of their respective postoffices.

Communications and letters asking information should be addressed to

Dr. J. M. SAFFORD, Sec'y,
Nashville, Tenn.

The Honorary Degree of Doctor of Medicine was conferred by Vanderbilt University upon Isham W. Perkins of Tennessee, and by the University of Nashville upon John A. Wood of Georgia.

PRIZES AWARDED

The following Prizes were awarded at the Commencement in February :

The Vanderbilt Founder's-Department Medal—to JOHN E. HILL of Tennessee.

Faculty Medal University of Nashville—to EDWARD KELLY of Kentucky.

Prof. Callender's Medal for best Thesis in Physiology—to J. W. STOKES of South Carolina.

Prof. Briggs's Prize for best Report on Surgery—to S. T. ROBINSON, Jr. of South Carolina.

Prof. C. S. Briggs's Prize in Operative Surgery—to W. H. ALLEY of Mississippi.

University Quiz Association (conducted by Drs. Morrison, Ewing, Haggard, Menees and Steger)—to EDWARD KELLY of Kentucky, for general proficiency.

Dr. R. W. Steger's Medal in Physical Diagnosis—to O. L. ROGERS of Virginia. This Medal was given last year to D. S. J. SPRULL of Alabama.

Dr. C. C. Atchison's Medal in Materia Medica—to W. H. ALLEY of Mississippi.

SPRING COURSE OF LECTURES, 1882.

The Faculty of the Medical Department of the University of Nashville and of Vanderbilt University, in connection with the Auxiliary Faculty of the Institution, will have a Spring Course of Lectures,

Commencing March 1st and ending June 1st, 1882.

This course may be regarded as introductory to the succeeding and regular Fall and Winter course. Attendance upon it is not required, neither does it count as a session towards graduation; but students who attend it will be furnished with certificates, which will be taken as additional evidence of proficiency in candidates applying for the degree of Doctor of Medicine.

There will be a Lecture each day by a Professor on some subject germane to his chair. In addition, Lectures will be delivered and Recitations conducted by the following instructors:

CHARLES S. BRIGGS, M. D., Surgery.
AMBROSE MORRISON, M. D., Physiology and Diseases of Children.
W. D. HAGGARD, M. D., Obstetrics.
WILLIAM G. EWING, M. D., Chemistry and Diseases of Women.
R. W. STEGER, M. D., Practice of Medicine.
ORVILLE H. MENEES, M. D., Anatomy.
C. C. ATCHISON, M. D., Materia Medica and Therapeutics.

The fee for the Spring Course will be \$30, which amount will be deducted from the fees of the Regular Course for all who attend the succeeding Fall and Winter.

The object of this course of instruction is to afford Students the greatest possible facility for the attainment of a thorough scientific and Practical knowledge of Medicine.

The prominent features will be Clinical Instruction and Recitations, with the use of text-books, though Didactic Lectures will be given on the various branches of Medicine and Surgery.

The Lecture Rooms, Museum, Apparatus and Dissecting Rooms of the College Building, will be used by the Instructors, just as during a Winter Course.

The Class will enjoy, furthermore, the advantages of the Hospital, which is in immediate connection with the Lecture Rooms of the College.

For further information, address

DR. J. M. SAFFORD, Sec'y,
NASHVILLE, TENN.
