Announcement of the Session of 1858--9.

MEDICINE is taught in this Institution NINE months annually. There will be two Sessions, but only one public commencement, as they count for one Course. A Summer Session, commencing the first Monday of each April, continues four months, and is especially devoted to Clinical Instruction, Practical Demonstration, and daily Examinations. The regular Winter Session opens the first Monday of each November, and Commencement is held early in March following. Students may, however, be examined for the degree in July.

A *Preliminary Course* of Lectures, free to all Students, will be given by the Professors, commencing on the first Monday of October; and, at the same time, the Anatomical Rooms will be opened for Students, under the supervision of the Professor of Anatomy. The Ticket for Practical Anatomy is obligatory one session.

The TENNESSEE STATE HOSPITAL, under the direction of the Faculty, is open to the Class, free of charge; and a Clinique has been established in connection with the University, at which operations are performed, and cases prescribed for and lectured upon, in the presence of the Class. The Hospital is now under the management of the Sisters of Charity, and is in every respect, a First Class one.*

* This Hospital is no make-shift or make-believe. It is a fine pile of substantial stone buildings surmounted by a dome. It presents a centre building three stories high—two wings each two stories, the entire front being 206 feet. The Hospital is capable of accommodating 150 patients in well ventilated wards. The Hospital grounds consist of 10 acres enclosed by a substantial fence of hammered stone, and laid out in grass plots well ornamented with shade trees.

During the week the Dean has been engaged in preparing and superintending the Printing of this Catalogue, the following operations have been performed at the Hospital.

1. Amputation of Thigh—male aged 38 from Georgia. 2. Amputation Arm—woman aged 25, Tennessee. 3. Amputation Thigh—male aged 18, Tennessee. 4. Amputation middle finger at Metacarpo-Phalangeal Articulation. 5. Cataract, both eyes—male aged 58, Mississippi. 6. Cataract one eye, male 52, Tennessee. 7. Cataract both eyes, male 48; South Carolina. 8. Cataract, one eye, male 45, Kentucky. 9. Exostosis of the Femur; male aged 24, Tennessee, Tumor large. 10. Immense Psoas Abscess opened, male, aged 56. 11. Cut throat, larynx opened, (attempted suicide,) male. 12. Incised Wound of the Scalp, male aged 30. 14. Fracture into the Elbow Joint. 14. Contused Ankle, male. 15. Excision of a part of the Os Calcis, male. 16. Circumcision, male, aged 14; Tennessee. 17. Tapping twice of Abdomen, female, aged 18. 18. Staphylo-raphy, female, aged 27, Ohio.

The whole domestic care of the Hospital is under the Sisters of Charity, who give their entire energies to the Institution. It may justly be regarded as a model Hospital, giving every advantage to the Student for Clinical Instruction, during his attendance upon the Lectures, of which he can possibly avail himself.

The Candidate for the degree of *Doctor of Medicine* must have attained the age of twenty-one years, and have been engaged in the study of Medicine three years. He must have attended two full Courses of Lectures in a regular and accredited School of Medicine; the last of which, in this Institution. He must write an acceptable Thesis, and deposit it with the Dean on or before the first day of February, on some Medical subject of his own selection. He must, at the time of receiving the degree, acknowledge the right of the Faculty to revoke it, should he engage in irregular or unprofessional practices.

F E E S .

The Fees for a full Course of Lectures amount to	-	\$105 00
Matriculation Fee, (paid only once,)	-	5 00
Practical Anatomy, (obligatory one session, in any accredited Medical College,)	10 00
Graduation Fee,	25 00

Good Board can be procured at \$3 to \$4 per week. Further information can be obtained by addressing

W. K. BOWLING, M.D.,
Dean of the Faculty.
