STEPHAN DEUBLER, *Janitor.*

STATE NORMAL COLLEGE.

COURSE OF STUDY, ETC.

The State Normal College was opened with appropriate ceremonies on Wednesday, the 1st of December, 1875, and is designed for the professional education of Teachers, and "practice in all the grades of instruction." It constitutes with its Model School, the Literary Department of the University of Nashville, but is under the sanction of the State of Tennessee. It derives its support at present from the funds of the University and the "Peabody Education Fund." It receives as students young gentlemen and ladies from Tennessee or any of the States, and is designed, by the three Boards interested in its welfare, to become a centre of educational influence for this and all neighboring States.

ADMISSION.

Persons applying for admission must not be "under sixteen years of age, nor over thirty." Candidates must present a certificate of good moral character; must declare their intention to become teachers, and their willingness to observe faithfully the regulations and perform the duties required while members of the institution, and must pass a satisfactory examination in the ordinary grammar-school studies.

DESIGN.

The State Normal College is strictly professional, and does not, where it can possibly be avoided, propose to undertake any work which can be as well performed in the ordinary schools. The more thorough and complete the previous education of the student, the more valuable will be the advantages to be acquired at the College.

The institution designs to prepare its students, as far as possible, for the organizing, teaching, and general management of schools and higher educational institutions, both public and private. To effect this object, the

COURSE OF INSTRUCTION

Requires that the student should possess a thorough knowledge—*first*, of the branches of learning required to be taught in the different grades of school, and which should be as far as possible, previously acquired; and, *second*, of the most economical and effective method of teaching those branches. Consequently, the course of instruction embraces a rapid review of the more elementary studies with reference to the best ways of teaching them, a review of the higher branches of knowledge with the same object, and a careful study of such other branches as time and circumstances will permit. The scholastic year is divided into three terms.

STUDIES.

First Term.—Primary and grammar-school studies, with reference to teaching them, viz.: Arithmetic, oral and written; Geography, physical and civil; Map Drawing, English Grammar and Analysis, etc.

Second Term.—Geometry, Chemistry with its applications to the purposes of common life; History of the United States, Physiology and Hygiene, Map Drawing, etc.

Third Term.—Geometry completed, Chemistry completed, Rhetoric, Book-keeping.

SECOND YEAR.

First Term.—Algebra, English Literature, Natural History, Natural Philosophy.

Second Term.—Trigonometry, Intellectual Philosophy, Geology, English Literature.

Third Term.—General History, Trigonometry, Botany, Intellectual Philosophy.

THIRD YEAR.

First Term.—Calculus, Astronomy, Constitution of the United States, School Laws of Tennessee, Moral Science, Practice and Observation in Model School.

Second Term.—Calculus, Astronomy, Reviews in Grammar and High-School Studies, Critical Readings of English Classics, Practice and Observation in Model School.

Third Term.—Physics and Natural History with reference to Object Teaching, Theory and Art of Teaching, Practice and Observation in Model School, Languages, etc., reviewed and completed.

Such changes will be made in this course from time to time, and such studies added, as circumstances may require.

The Latin, French and German languages, are taken according to a parallel course. Drawing with black-board delineations, English Composition, Reading, Spelling, Defining, Penmanship, Vocal Music, etc., receive attention throughout the year. There is also a weekly exercise in the "current events" of the day.

As this is designed to be a strictly professional institution, all studies, from the beginning to the end of the course, are taught with special reference to teaching them; and no study or exercise is deemed satisfactory which cannot be readily reproduced in the same or a better manner.

Students are required, in every study, to occupy temporarily the place of the teacher of the class, subject to the criticisms of both teacher and classmates; and, at appointed times, the more advanced students are required to take the charge of the whole department, and give a short general lesson, subject also to criticism.

All studies are treated upon the topical plan, with such use of text-books as may be deemed advisable.

DISCIPLINE.

All students are expected to govern themselves; if unable or unwilling to do this, they will be regarded as unfit for the responsible duties of the teachers' profession.

CERTIFICATES AND DIPLOMA.

To such students as are able to remain at the institution only a portion of the time required for the full course, a certificate may be given, stating the time spent at the institution, and the general impressions of the teachers.

Those who complete satisfactorily the first two years of the course will be entitled to a certificate signed by the officers of the State Normal College and of the State Board of Education.

Persons who can remain for only a part of the time prescribed, and have an honorable discharge, will be allowed to resume and complete the course at a future opportunity.

The Diploma of the University is given to those only who have completed the entire course, and on all such the degree of "LICENTIATE OF INSTRUCTION" is formally conferred. A law of the State of Tennessee directs that "the possession of such Diploma shall exempt the holder thereof from the examination prescribed as a condition precedent to employment in the Public Schools of the State; any such graduate being eligible as a teacher in any County of the State."

TERMS, ETC.

The scholastic year commences on the first Wednesday in October, and closes on the last Wednesday in May. The year is divided into three terms, with but one regular vacation, *i. e.*, at the holidays. The daily sessions are short, and are designed to be actively employed in recitation, practice, etc., etc. All study and preparation for the student's work is to be done at his room.

EXPENSES.

Tuition is at present free. Every student, however, is expected to pay at the beginning of each term, \$1.00 for the use of such books as are provided by the institution, and for incidental expenses.

PEABODY SCHOLARSHIPS.

In view of the want of well established and thoroughly furnished Normal Schools of a high order in the South, except for colored teachers, and of the fact that few of the States in this section of the country are in a condition to establish one at present within their own borders, the Trustees of the Peabody Educational Fund have contributed a part of the amount necessary to convert the Literary Department of the University of Nashville into a State Normal College. They have furthermore determined to establish in this school a limited number of scholarships, of \$200 each, for the encouragement and aid of pupils from adjoining States, whose characters, abilities and general culture give special promise of usefulness as teachers.

Applicants must have the unqualified recommendation of the State Superintendent of Public Instruction, pass, with an examiner appointed by the undersigned for the purpose, a good examination for a graduate of a first-class High School, be accepted by President STEARNS, and promise to teach at least two years, if they have opportunity. If, upon a half year's trial, reasonable expectations are not met, the scholarships will be discontinued. The longest period for which it will be given to any pupil is two years. Application is to be made to the undersigned, or to President STEARNS through the State Superintendent.

B. SEARS,
General Agent.

STAUNTON, VA., October 1, 1876.

In view of the liberality of the Trustees of the Peabody Educational Fund, and to carry out the design contemplated in the above circular more fully, it has been determined to make no charge for tuition in the case of those holding "scholarships," and that tuition shall also be free to all

students from Tennessee, ladies or gentlemen, who intend to fit themselves for the teachers' profession. A charge, however, of \$3 per annum will be made in every case for use of books and for incidental expenses.

Catalogues and further information may be obtained from

EBEN S. STEARNS,
President, etc.

MONTGOMERY BELL ACADEMY DEPARTMENT.

This branch of the University was founded by the bequest of the late MONTGOMERY BELL. It is designed to fit boys for college and for business. By the will of the Founder, gratuitous instruction is given to twenty-five boys, of not less than ten or more than fourteen years old, "who are unable to support and educate themselves, and whose parents are unable to do so," from the Counties of Davidson, Dickson, Montgomery, and Williamson, Tennessee. It consists of two Departments—High, or Academical, and a Grammar School; each having a *three* years' course of studies, selected and taught on the most approved modern methods.

Believing that, in its adaptation to the wants of the country, the system of training pursued and the advantages it affords for a complete and thorough education, it is unsurpassed, it is offered with the greatest confidence to such as wish to prepare themselves for admission to any College or University, or for business pursuits.

A Primary School for children is in contemplation.

COURSE OF STUDY.

HIGH SCHOOL, OR ACADEMICAL DEPARTMENT.

Senior Class.—Geometry, Latin, Greek, History of Greece, Geology, Astronomy, Spelling, Composition, Declamation.

Middle Class.—Algebra, Latin, Greek, History of Rome, Natural Philosophy, Chemistry, Spelling, Composition, and Declamation.

Junior Class.—Arithmetic, Book-keeping, Latin, English History, Physiology, Physical Geography, Spelling, Composition, and Declamation.

GRAMMAR SCHOOL.

Ordinary English branches.

The Scholastic year will commence on the 21st of September, and close on the 16th of June, with a vacation at the holidays.

EXPENSES.

Tuition in High School—per annum.....	\$80 00
Tuition in Grammar School—per annum.....	60 00
Gymnasium Fee.....	1 00

Application for admission should be made as early as possible in every case—for the Normal Department to EBEN S. STEARNS, Chancellor of the University of Nashville, and for the Montgomery Bell Academy to Prof. J. W. YEATMAN, Principal.

STUDENTS:

ADAMS, THOMAS EAKIN.....	Nashville, Tenn.
AMENT, ORVILLE.....	Nashville, Tenn.

MEDICAL DEPARTMENT,

EBEN S. STEARNS, D. D., Chancellor of the University.

FACULTY:

WILLIAM K. BOWLING, M. D.,
Professor of Malarial Diseases and Ethical Medicine.

WILLIAM T. BRIGGS, M. D.,
Professor of Surgery.

THOMAS L. MADDIN, M. D.,
Professor of the Institutes and Practice of Medicine.

WILLIAM L. NICHOL, M. D.,
Professor of Diseases of Women and Children, and of Clinical Medicine.

JOHN H. CALLENDER, M. D.,
Professor of Diseases of the Brain and Nervous System.

VAN S. LINDSLEY, M. D.,
Professor of Physiology, and Lecturer on the Diseases of the Eye and Ear.

THOMAS MENEES, M. D.,
Professor of Obstetrics.

JAMES M. SAFFORD, M. D.,
Professor of Chemistry.

THOMAS A. ATCHISON, M. D.,
Professor of Materia Medica, Therapeutics, and State Medicine.

THOMAS O. SUMMERS, JR., M. D.,
Professor of Anatomy and Histology.

CHARLES S. BRIGGS, M. D.,
Demonstrator of Anatomy and Curator of Museum.

THOMAS W. MENEES, M. D.,
Demonstrator of Anatomy.

WILLIAM J. SNEED, M. D.,
Assistant to Chair of Surgery.

ADDISON A. EAST, M. D.,
Assistant to Chair of Diseases of the Brain, etc.

AMBROSE MORRISON, M. D.,
Assistant to Chair of Physiology.

W. D. HAGGARD, M. D.,
Assistant to Chair of Obstetrics.

JOHN H. SNIVELY, Phar. D.,
Assistant to Chair of Chemistry.

W. J. McMURRAY, M. D.,
Assistant to the Chair of Materia Medica, etc.

M. BAXTER, M. D.,
Assistant to Chair of Anatomy, etc.

THOMAS L. MADDIN, M. D., President of the Faculty,

WM. T. BRIGGS, M. D., Dean,

JAMES M. SAFFORD, M. D., Secretary of the Faculty.

All communications and letters asking information should be addressed to

DR. J. M. SAFFORD, Sec.,

NASHVILLE, TENNESSEE.

ANNOUNCEMENT.

SESSION 1877-'78.

THE TWENTY-NINTH Regular Course of Instruction in the Medical Department of the University of Nashville will commence on Monday, the 1st day of October next, and end on the last Thursday in February, 1878.

On the 17th of September next—two weeks before the Lectures commence—the Anatomical Rooms will be opened for students. The facilities for the study of Practical Anatomy are complete.

In again issuing the Annual Announcement, the Board of Trustees would call the public attention, and that of the Medical Profession especially, to the unexampled career of prosperity which the Medical Department has hitherto exhibited. The munificent

ENDOWMENT

Of buildings on which it was founded, has been increased and extended from time to time, until it now affords a basis for permanency and successful instruction, which enables its corps of able teachers to maintain the signal distinction it has so long held among American Schools of Medicine, and with its splendid

EQUIPMENT

Of Hospital facilities, Museum, Cabinets, Apparatus, etc., justifies the liberally

LOW RATE OF FEES

Charged for tuition. The prevailing spirit in the matter of all varieties of education is to make that great boon as accessible and as nearly free to all who desire it, as possible; and by the generous and cordial support which we have

granted to the Medical Department, its Faculty have been authorized to present inducements in this respect unsurpassed by any similar institution of equal age and established reputation, as an Alma Mater of Physicians, now numbering, as it does, nearly two thousand in its Catalogue of Graduates.

THE CHAIR OF MALARIAL DISEASES AND ETHICAL MEDICINE

Has been created to meet the wants of the practitioner in the treatment of malarial diseases in all their protean forms, and of the profession everywhere, in the promotion of a higher esthetic culture. It is with pleasure that the Faculty announce the return of Dr. W. K. BOWLING to his old field of labor and of love. In the Department assigned him he has long held advanced views of the highest interest to the profession.

LOCATION.

It would be difficult to find a city combining more advantages, as a location for a Medical School, than Nashville. Highly favored in climate, midway between the cold of more Northern cities and the debilitating temperature of the extreme South; a great railroad center, to which lines converge from all directions, having an active population of nearly fifty thousand; surrounded by an exceedingly fertile and beautiful country, thickly peopled; the capital of the State; the location of the Blind and Lunatic Asylums; the seat of great Universities—all, make it a place for a School Medicine.

COLLEGE BUILDING AND MUSEUM.

The building occupied by the Medical School is a large and commodious edifice. This, in connection with the hospital, forms a handsome block of buildings, presenting two fronts, and of imposing appearance. The ample grounds around the block extend across from College to Market

streets, and include an entire square. The College building has a large hall for lecturing and general purposes, a spacious Chemical Laboratory and Lecture Room, a well-arranged Amphitheatre, a very large and inviting Museum Room, together with two large and well ventilated Dissecting Rooms, Special Laboratories, Professors' and Apparatus Rooms, Janitors' Rooms, etc. The entire building is supplied with water and gas, and is heated with furnaces, and made comfortable during the limited cold weather we have in this climate.

The Museum is noted for its extent, and the value and variety of its Anatomical, Physiological, Pathological, Surgical, and Obstetrical specimens, and for its Cabinet of *Materia Medica*. It has been recently re-arranged, and rendered more complete by new additions. The Chemical portion is well supplied with medicinal substances and preparations, and such other articles as may be required in the elucidation of the theory and practice of Chemistry and Pharmacy.

METHOD OF TEACHING.

It is the purpose of the Faculty to make the teaching thorough and practical. *Five* Lectures will be delivered daily, in the College Halls, upon the different subjects of the course. During the week, the student will hear *four* Lectures upon each branch of Medicine. Daily examinations or reviews will be held by each Professor at the beginning of his hour, in order that the facts of the previous Lecture may be impressed upon the minds of the students. The various Courses will be illustrated by experiments, dissections, surgical operations, clinics, models, anatomical, botanical, and chemical specimens, and by such other means as may make the instruction imparted practical and pointed. The Cabinets of Anatomy, Physiology, Pathology, Obstetrics, Surgery, *Materia Medica*, and Chemistry, are richly supplied with preparations and specimens, which will be used as occasion demands.

The Chair of Obstetrics, in addition to its full supply of Models in wax, apparatus, instruments, etc., has recently

had added to it modern plates and diagrams, making complete its equipage for the elucidation of the entire Course. The Cabinet of *Materia Medica* has also been liberally supplied with plates, representations of medicinal plants, specimens of drugs and chemicals, and all the appliances for the illustration of the branch. The members of the Class will be invited during the Course, to inspect for study this well supplied Cabinet, with which the Museum is furnished.

HOSPITAL AND CLINICAL INSTRUCTION.

The Hospital building, erected last year by the Faculty, and entirely under their control, has a frontage of one hundred and fifty-four feet, with other dimensions in proportion, and adjoins the College edifice. Its wards, well filled at all times with ample material for Surgical and Medical teaching, are immediately accessible from the Lecture Halls. This is a peculiar feature, enjoyed by very few Medical Institutions, and one that, with us, has been pronounced by visitors of large experience as teachers, very superior and excellent in arrangement.

In addition to the College Hospital, the hospital wards of the State Prison, numbering eleven hundred inmates, will supply numerous clinical patients.*

In the two hospitals the facilities for witnessing Operative Surgery are unsurpassed. Twice a week operations are performed in the presence of the Class. The number of these operations is very large, and the variety great, embracing every Surgical disease and injury, including the Surgical operations of the eye and ear.

The Obstetrical Ward of the Hospital will be under the clinical control of the Professor of Obstetrics and his Assistant. It is designed to render students familiar with the practical details of Parturition, by assigning to their care, under the supervision of the Professor or Assistant, such cases as may be available, not only in the Hospital, but in private practice also. In this way it is proposed to teach

* All charity patients will be treated for disease or be made the subjects of necessary operations, before the Class.

them to diagnose the various presentations and positions, more fully to comprehend the mechanism of labor, and give them facility in manual manipulation and instrumental delivery.

The facilities enumerated afford the Professors of Surgery, Obstetrics, Practice, Clinical Medicine, etc., with a field for the thorough teaching of disease, as seen at the bed-side, unsurpassed by any institution in the country.

DISEASES OF THE EYE AND EAR.

Professor Lindsley, in addition to his Lectures on Physiology, will deliver a course of Lectures on the diseases of the Eye and Ear, which will be fully illustrated by Clinical material supplied from the Hospital, and from private practice. The Normal and Pathological conditions of the Eye and Ear will be made especially interesting by the use of the magic lantern, which renders drawings of these conditions life-like and satisfactorily visible to an entire Class.

PRACTICAL ANATOMY.

The Anatomical Rooms, which are under the general direction of the Professor and Demonstrators of Anatomy, are abundantly supplied with fresh and wholesome material. The Demonstrator and his Associate will be present every evening to direct and assist in dissections. Students will be taught the art of injecting, preparing, and preserving specimens, both wet and dry; also the manner of making corroded specimens of the vessels, tubes, and ducts of the various organs. At the proper time, Classes in Operative Surgery will be formed, and each student will receive practical instruction upon the Cadaver, in the application of the bandage, in the ligation of arteries, and in the performance of amputations, re-sections, etc. This Department will be opened on the 26th of February.

GRADUATION.

I. To Graduate, the candidate must have attained the age of twenty-one years, and be of good moral character.

II. He must have attended two full Courses of Lectures, the last of which must have been in this Institution. If the candidate has attended a full Course of Lectures in a regular Medical School, or can show that he has been in reputable practice for four years, he may, by attendance upon a full Course of Lectures in this Institution, present himself for Graduation. It is required also that the Dissecting Ticket be taken for at least one session.

III. The candidate is elected by ballot, and upon receiving THREE NEGATIVE votes will be rejected, but will be entitled to another examination by appearing before a full Faculty, after all other applicants have been examined. NO PERMATURE EXAMINATION WILL BE GRANTED EXCEPT BY CONSENT OF THE ENTIRE FACULTY.

IV. Candidates will not be registered for examination until all fees are paid.

FEES.

Matriculation (paid but once).....	\$ 5 00
Professors' Ticket.....	50 00
Dissecting Ticket.....	10 00
Graduating Fee.....	30 00

NO CHARGE IS MADE FOR THE PRIVILEGE OF THE HOSPITAL. Students, upon their arrival, must call at the Secretary's office, and, after registering their names, pay for their tickets.

Graduates of Regular Schools will be admitted to the Lectures upon the payment of Matriculation Fee.

TEXT BOOKS.

Anatomy: <i>Gray.</i>	Diseases of Children: <i>Meigs and Pepper.</i>
Surgery: <i>Billroth, Paget, Erichsen, Gross.</i>	Physiology: <i>Kirke, Dalton.</i>
Obstetrics: <i>Leishman, Playfair.</i>	Materia Medica: <i>Stille, Waring.</i>
Diseases of Women: <i>Thomas or Barnes.</i>	Chemistry: <i>Attfeld, Fownes.</i>
Dictionary: <i>Dunghlison.</i>	Theory and Practice: <i>Watson Aitken.</i>

DIRECTIONS TO STUDENTS.

It will be best for students, upon arriving in the city, to take a hack, and, with their baggage, go immediately to the *Medical College and Hospital, on South College Street* (between Franklin and Priestly Streets), where they can obtain assistance in securing such boarding houses as they may desire. Boarding can be obtained at from three to five dollars per week.

All Communications and Letters asking information should be addressed to

*Dr. J. M. SAFFORD, Sec.,
Nashville, Tennessee.*

PRIZES.

The medals announced at the beginning of the last Fall and Winter Term were awarded at the Commencement in February as follows :

Vanderbilt University Founder's Medal, for the best qualified student in all branches, to W. R. Lambuth, of China.

University of Nashville Faculty Medal, for the student of that University best qualified in all branches, to Henry Owen, of Arkansas.

Anatomy (by Prof. Summers) to Henry Owen, of Arkansas.

Gynecology (by Prof. Nichol) to E. H. Wells, of Missouri.

Obstetrics (by Prof. Menees) to Henry Owen, of Arkansas.

Chemistry (by Prof. Safford) to R. W. Steger, of Nashville.

Materia Medica and Therapeutics (by Prof. Atchison) to W. G. Ewing, of Nashville.

Prizes for the next term will be announced soon after the opening of the School.

An arrangement has been made by which students matriculating in the Medical Department of the Vanderbilt University use the buildings and Museum of the University of Nashville. The list of Graduates below include matriculates of both Universities.
