

COPING AND HEALTH-RELATED QUALITY OF LIFE IN  
RENAL TRANSPLANT PATIENTS

By

Hongxia Liu

Dissertation

Submitted to the Faculty of the  
Graduate School of Vanderbilt University  
in partial fulfillment of the requirements

for the degree of

DOCTOR OF PHILOSOPHY

in

Nursing Science

May, 2006

Nashville, Tennessee

Approved:

Professor Kathleen A. Dwyer

Professor Vaughn G. Sinclair

Professor Irene Feurer

Professor Laurence E. Lancaster

## ACKNOWLEDGEMENTS

I am grateful to all those with whom I have had the pleasure to work during this project. I would like to give my sincerest appreciation to the members of my dissertation committee for their professional guidance and thoughtful review of my work. To my graduate advisor and committee chairman, Dr. Kathy Dwyer, words cannot describe my appreciation. Thank you for what you have taught me about thinking, about research, about working with people, and for your support and commitment to my successful completion of the doctoral program. I would like to thank my dissertation co-chair, Dr. Vaughn Sinclair, for her support, inspiration, encouragement, and thought-provoking questions throughout this process. I would like to thank Dr. Larry Lancaster for his valuable input, support, and particularly his patience in editing my manuscript. I would especially like to thank Dr. Irene Feurer. As a committee member and mentor, she has taught me more than I could ever give her credit for here. Thank you for your support, encouragement, and unfailing patience in sharing your expertise in statistical analysis.

I would like to thank Dr. Peter Buerhaus for his encouragement and financial support of my study in the PhD program. A special thank you goes to Dr. C. Wright Pinson for his kind financial support to my study and dissertation project. I would like to thank all the staff of the kidney transplant program of the Vanderbilt Transplant Center for their valuable input and support of my data collection. I would like to thank my classmates, Sharon Karp and Haley Hoy, for their support and encouragement. A general thanks is extended to the Graduate School and School of Nursing of Vanderbilt University for their financial support of my PhD study.

Finally, I would like to thank my parents, Mr. Ye Liu and Ms. Zhaoe Zhang, whose love and guidance are with me in whatever I pursue. I would like to thank my brothers, Youxue Liu and Wenge Liu, for their encouragement and support. Most importantly, I wish to thank my husband, Longhua Tang, for his love, support, and encouragement. Without his inspiration, I would not have been able to attain my goal of earning a PhD in nursing.

## TABLE OF CONTENTS

	Page
ACKNOWLEDGEMENTS.....	iii
LIST OF TABLES .....	viii
LIST OF FIGURES.....	ix
Chapter	
I. INTRODUCTION.....	1
II. REVIEW OF LITERATURE.....	8
Health-related quality of life in renal transplant patients.....	8
History of the concept of health-related quality of life .....	8
Conceptual approaches to health-related quality of life of renal transplant patients.....	11
Methodological approaches to health-related quality of life of renal transplant patients .....	13
Coping in renal transplant patients .....	21
History of coping .....	21
Theory of coping.....	23
Self-efficacy.....	25
Social support .....	26
Conceptual approaches to coping in renal transplant patients.....	28
Methodological approaches to coping in renal transplant patients.....	29
Synthesis of conceptual and methodological knowledge of coping and health-related quality of life in renal transplant patients .....	39
Strengths and weaknesses of conceptual approaches .....	39
Strengths and weaknesses of methodological approaches .....	41
Gaps in the literature .....	42
Proposed conceptual framework .....	43
Research questions.....	46
Research questions.....	46
Hypotheses.....	47
Definition of terms.....	47
III. METHODOLOGY .....	49
Study design .....	49
Research setting.....	49

Sample and sampling plan .....	50
Sample characteristics .....	50
Sample size .....	51
Recruitment .....	51
Data collection methods.....	52
Instruments .....	52
Procedures .....	57
Human subjects' protection.....	58
Data analysis procedures.....	59
Preparation for path analysis .....	60
Analysis .....	67
 IV. RESULTS .....	 68
Description of the sample.....	68
Description of the instruments .....	73
Instrument reliability.....	73
Descriptive statistics of the instruments.....	73
Correlational analysis between observed variables .....	81
Path analysis of proposed models.....	88
Initial model.....	89
Alternative model.....	90
Hypothesized model.....	96
Multivariate analysis of variance on research question two .....	104
Summary of results .....	107
 V. DISCUSSION .....	 110
Sample characteristics.....	110
Interpretation of the instruments .....	112
Interpretation of the bivariate correlation analysis .....	118
Interpretation of research questions.....	122
Strengths and limitations of the study.....	137
Recommendations for future research .....	140
Conclusions and implications for nursing practice.....	141
 Appendix	
A. COGNITIVE APPRAISAL OF HEALTH SCALE (CAHS).....	145
B. PERSONAL RESOURCE QUESTIONNAIRE (PRQ2000).....	148
C. PERCEIVED HEALTH COMPETENCE SCALE (PHCS).....	150
D. BRIEF COPE .....	152

E. HEALTH STATUS SURVEY (SF-36®) .....	155
F. SYMPTOM CHECKLIST.....	159
G. DEMOGRAPHIC AND CLINICAL DATA FORM .....	161
REFERENCES.....	164

## LIST OF TABLES

Table	Page
1. Summary of Participant Demographic Data .....	69
2. Summary of Participant Clinical Data .....	72
3. Internal Consistency Reliability of Instruments.....	74
4. Descriptive Statistics of Instruments (Total Sample) .....	75
5. Descriptive Statistics of Instruments (Early Group) .....	76
6. Descriptive Statistics of Instruments (Later Group).....	77
7. Correlation Coefficients between Observed Variables (Total Sample) .....	84
8. Correlation Coefficients between Observed Variables (Early Group).....	85
9. Correlation Coefficients between Observed Variables (Later Group).....	86
10. Path Coefficients in Alternative Model Predicting PCS and MCS .....	91
11. Path Coefficients in Empirical Model Predicting PCS.....	95
12. Path Coefficients of Empirical Model Predicting MCS .....	95
13. Path Coefficients in Modified hypothesized Model Predicting PCS .....	100
14. Path Coefficients in Modified Hypothesized Model Predicting MCS .....	100
15. Direct, Indirect, and Total Effects in the Modified Hypothesized Model Predicting PCS .....	101
16. Direct, Indirect, and Total Effects in the Modified Hypothesized Model Predicting MCS .....	101
17. MANCOVA of Clinical Factors on Psychosocial Variables Controlling for Time Post-transplant.....	105
18. Effects of Time Post-transplant Group on Psychosocial Variables .....	106

## LIST OF FIGURES

Figure	Page
1. Proposed Model of Coping and HRQOL in Renal Transplant Patients .....	44
2. Initial Model.....	63
3. Alternative Model.....	64
4. Hypothesized Model.....	66
5. Empirical Model Predicting PCS .....	93
6. Empirical Model Predicting MCS .....	94
7. Modified Hypothesized Model Predicting PCS .....	98
8. Modified Hypothesized Model Predicting MCS.....	99
