## **ACKNOWLEDGEMENTS**

I would like to take this opportunity to thank my advisor Dr. Sankaran Mahadevan for his extensive technical guidance and support throughout the course of this study. I would also like to acknowledge the technical inputs provided by Dr. Zissimos Mourelatos, Dr. Jian Tu, Dr. Tong Zou and fellow researchers in reliability and optimization methods at Vanderbilt.

I would also like to thank my friends and colleagues at Vanderbilt who made my stay extremely enjoyable and most importantly my parents who constantly supported me and encouraged me to reach higher.

This study was supported by funds from General Motors through purchase order no. ND0044200 (Project monitor: Dr. Jian Tu). The support is gratefully acknowledged.
