# ANNOUNCEMENT.

SESSION OF 1883-4.

---

THE Regular Course of Instruction in the Medical Departments of the University of Nashville and of Vanderbilt University will commence on Monday, the first day of October next, and end on the last Thursday in February, 1884, which is Commencement Day.

The Preliminary Course of Instruction will begin on Monday, the 3d day of September, and will be free to all who enter the Regular Course. The Anatomical Rooms will be opened at the same time. Material for dissection will be promptly supplied.

In again issuing the Annual Announcement, the attention of the medical profession and that of the public is called to the

## Unexampled Prosperity

which has attended this school. The last graduating class was above the average in numbers and in proficiency attained. The prospects for the coming session are highly flattering.

The munificent endowment of buildings, on which the school was founded, has been from time to time greatly increased and extended. Its superior equipment of Hospital facilities, Museum, Cabinets, Apparatus, etc., enables its corps of teachers to maintain the distinction it has so long held among American schools of medicine. As an *Alma Mater* of Physicians, it now numbers more than twenty-five hundred (2,510) in its Catalogue of Graduates.

## Additions to the Teaching Corps.

It has come to be generally recognized by the profession that Ophthalmic and Aural Surgery deserves to rank as a special department in a thorough curriculum of teaching. In that view, a Chair of Diseases of the Eye and Ear has been established. Professor Van S. Lindsley, M.D., who for a number of years has filled with distinction the Chair of Anatomy, and, in practice, has devoted his exclusive attention to such diseases, has been transferred to the newly-created Chair. The well-established reputation of Prof. Lindsley gives a sufficient guarantee that the position will be ably filled.

To the Chair of Anatomy, vacated by this transfer, Orville H. Menees, M.D., who for the past four years had with marked ability occupied the important position of Demonstrator of Anatomy, has been elected. The scope of this fundamental branch of medical education has also been enlarged, and the title of the Chair is now Anatomy and Histology.

With the purpose of extending the curriculum of surgical teaching, a new Chair, entitled Surgical Anatomy and Operative Surgery, has also been created, to which Charles S. Briggs, M.D., has been called. In the Chair of Adjunct Professor of Surgery, filled by him for several years past, Dr. Briggs has acquired repute as an able and efficient teacher.

The position of Demonstrator of Anatomy has been filled by the election of Charles L. Eves, M.D., a gentleman whose worth, attainments, and devotion to Anatomy distinguished him as a fit person to occupy this important place.

The Faculty has also organized a series of lectures on adjunct and subordinate subjects to the regular professional chairs, to be open to all students, without extra charge.

It is claimed that with these additions the scope and thoroughness of instruction which this institution offers to the medical public is equal to that of any school in the country.

### Location.

It would be difficult to find a city combining more advantages as a location for a medical school than Nashville. Highly favored in climate, midway between the cold of more northern cities and the debilitating temperature of the extreme South; free from epidemics; a great railroad center, to which lines converge from all directions; having an active population of fifty thousand; surrounded by an exceedingly fertile and beautiful country, thickly peopled; the capital of the State; the location of the Blind and Lunatic Asylums; the seat of great Universities—all make it a place for a School of Medicine.

### College Buildings and Museum.

The buildings occupied by the Medical School and the Hospital form a large and commodious edifice of imposing appearance, fronting both on College and Market streets. A large and commodious Lecture Hall, capable of seating five hundred students, and provided with comfortable opera seats, has been erected. The seats are numbered, and will be assigned to students in the order in which they matriculate. The building is heated by hot-air furnaces, and is ventilated by flues communicating with the furnace-stack. Since the close of the last session, improvements have been made in the Lecture Hall, so as to secure perfect heating and comfort in the very coldest weather.

The Hospital has been enlarged by the addition of three wards, and an amphitheater for Clinical and Operating purposes.

Besides, there is a large and inviting Museum Room, together with two large and well-ventilated Dissecting Rooms, Special Laboratories, Professors' and Apparatus Rooms, Janitors' Rooms, etc. The entire building is supplied with water and gas.

The Museum is noted for its extent, and the value and variety of its Anatomical, Physiological, Pathological, Surgical, and Obstetrical Speci-

mens, and for its Cabinet of *Materia Medica*. It has been recently re-arranged, and rendered more complete by new additions. The Chemical portion is well supplied with medicinal substances and preparations, and such other articles as may be required in the elucidation of the theory and practice of Chemistry and Pharmacy.

### Method of Teaching.

It is the purpose of the Faculty to make the teaching thorough and practical. *Five* Lectures will be delivered daily, in the College Halls, upon the different subjects of the Course.

Daily examinations or reviews will be held by each Professor at the beginning of his hour, in order that the facts of the previous Lecture may be impressed upon the minds of students. The various courses will be illustrated by Models, Anatomical, Botanical, and Chemical Specimens, Experiments, Dissections, Clinics, and Surgical Operations, and by such other means as may make the instruction imparted practical and pointed. The Cabinets of Anatomy, Physiology, Pathology, Obstetrics, Surgery, *Materia Medica*, and Chemistry, are richly supplied with Preparations and Specimens, which will be used as occasion demands.

The Chair of Obstetrics, in addition to its full supply of Models in Wax, Apparatus and Instruments, has recently had added to it Modern Plates and Diagrams, making complete its equipage for the elucidation of the entire Course. The Cabinet of *Materia Medica* has also been liberally supplied with Plates, representations of Medicinal Plants, specimens of Drugs and Chemicals, and all the appliances for the illustration of this branch.

### Hospital and Clinical Instruction.

The Hospital building, erected by the Faculty and under their exclusive control, has been enlarged by the addition of three large wards to its already commodious accommodations. It has a frontage of one hundred and fifty-four feet, with other dimensions in proportion, and adjoins the College edifice. Its wards, well filled at all times with material for Surgical and Medical teaching, are immediately accessible from the Lecture Halls. This is a peculiar feature, enjoyed by but few medical institutions, and one which has been pronounced by visitors, of large experience as teachers, very superior and excellent in arrangement.

Twice a week Surgical Clinics are held and Operations performed, when necessary, in the presence of the Class. The number of these operations is large, and the variety great, embracing every Surgical disease and injury.\*

The Obstetrical Ward of the Hospital will be under the Clinical control of the Professor of Obstetrics and his Assistant. It is designed to render

---

\*All *charity patients* will be treated for disease, or be made the subjects of necessary operations before the Class, *free of charge*.

students familiar with the practical details of Parturition, by assigning to their care, under the supervision of the Professor or Assistant, such cases as may be available, not only in the Hospital, but in private practice also. In this way it is proposed to teach them to diagnose the various presentations and positions, more fully to comprehend the mechanism of labor, and give them facility in manual manipulation and instrumental delivery.

The facilities enumerated supply the Professors of Surgery, Obstetrics, Practice, Clinical Medicine, etc., with all that can be desired for the thorough teaching of disease, as seen at the bedside.

### Practical Anatomy.

The Anatomical Rooms are abundantly supplied with fresh and well-preserved material. The Demonstrator will be present every evening to direct and assist in dissections.

This Department will be opened on the 3d of September.

### Graduation.

I. To graduate, the candidate must have attained the age of twenty-one years, and be of good moral character.

II. He must have attended *two* full courses of Lectures, the last of which must have been in this Institution. The first may have been in any other recognized Medical School.\* It is required, also, that the Dissecting Ticket be taken for at least one session.

III. He must have studied medicine for three years under a regular practitioner, the three years to include the time of attendance upon two courses of Lectures.

IV. The candidate is elected by ballot, and upon receiving THREE NEGATIVE votes, will be rejected; but will be entitled to another examination by appearing before a full Faculty, after all other applicants have been examined. NO PREMATURE EXAMINATION WILL BE GRANTED EXCEPT BY CONSENT OF THE ENTIRE FACULTY.

---

\*A graduated scheme of study, extending through three years, has been arranged for the accommodation of such students as wish to pursue a more prolonged course. This, though strongly recommended, is optional with the student. The scheme is as follows:

(1) The student may confine his attention for two full courses to Anatomy, Chemistry, Materia Medica, and Physiology, and after the end of the second course be examined upon these subjects.

(2) Such student, during the third course, to devote himself chiefly to Lectures upon the Theory and Practice of Medicine, Surgery, Obstetrics, and Diseases of Women and Children, upon which subjects only he shall be examined at the final examination for the degree of M.D.; his standing, however, to be determined by the result of both examinations.

## Fees.

Matriculation (paid but once).....	\$ 5 00
Professors' Ticket.....	75 00
Dissecting Ticket.....	10 00
Graduating Fee.....	25 00

The above includes all fees and charges made by the Faculty.

Students upon arrival will call at the office of the Registrar, in the Medical College and Hospital buildings, on South College street, or at the office of Prof. W. L. Nichol, south-east corner of Cedar and High streets, and after registering their names pay for their tickets.

## Text-books.

Anatomy: <i>Gray.</i>	Surgery: <i>Billroth, Paget, Gross, Erichsen, Bryant.</i>
Physiology: <i>Flint, Kirke, Dalton.</i>	Obstetrics: <i>Leishman, Playfair.</i>
Materia Medica: <i>Stille, Waring.</i>	Diseases of Women: <i>Thomas or Barnes.</i>
Chemistry: <i>Attfield, Fownes, Roscoe.</i>	Diseases of Children: <i>Smith.</i>
Dictionary: <i>Dunglison.</i>	Ear: <i>St. John Roosa.</i>
Theory and Practice: <i>Roberts, Britton, and Reynolds's System of Medicine.</i>	Eye: <i>Carter, Wells.</i>

## Directions to Students.

It will be best for students, upon arriving in the city, to take a hack, and, with their baggage, go immediately to the *Hospital and College Buildings, on South College Street, two squares south of Broad Street*, where they can obtain assistance in securing such boarding-houses as they may desire.

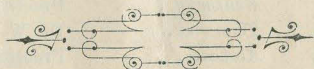

Boarding can be obtained at from \$3 to \$4.50 per week.

N. B.—We shall be pleased to receive the address of any physician who may desire a copy of the Catalogue.

Alumni of the School are urgently requested to notify the Secretary of their respective post-offices.

Communications and letters asking information should be addressed to

Dr. J. M. SAFFORD, Sec.,  
Nashville, Tenn.
